Solution Architecture:

- o Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions.
- o Its goals are to:
 - o • Find the best tech solution to solve existing business problems.
 - o • Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
 - o • Define features, development phases, and solution requirements.
 - o • Provide specifications according to which the solution is defined, managed, and delivered.
